Key Skills

React.js JavaScript (ES6+)

TypeScript Redux Toolkit Next.js

React Native Frontend Development

Performance Optimization REST APIs

Fintech

Loan Origination System (LOS)

Material UI Tailwind CSS HTML5

CSS3 Hooks Redux

Context API

Role Based Access Control (RBAC)

Dashboard Development

Web Application Development

React Query / TanStack Query Jest

Certification

- MERN Stack Certification
- Coursera Frontend Advanced

Profile Summary

Senior React.js Developer with over 5 years of expertise in designing and developing scalable, high-performance frontend applications for fintech and enterprise platforms. Proficient in React.js, JavaScript, TypeScript, Redux, and Next.js, with extensive experience in Loan Origination Systems (LOS), Sales Dashboards, Partner Portals, and role-based access control systems. Skilled in performance optimization, reusable component architecture, REST API integration, and enterprise-grade frontend solutions. Actively seeking Senior React Developer or Senior Frontend Engineer positions in product-based and fintech companies to leverage technical proficiency and deliver impactful user experiences.

Education

2020, Full Time
B.Sc, Computer Science
Mumbai University

Work Experience

2024 - Present
Senior Software Engineer
Avanse Financial Services

Key Result Area

- Senior React.js Engineer working on enterprise fintech platforms including Loan Origination Systems (LOS), Sales Portals, and Partner Dashboards
- Built and scaled complex React.js applications handling underwriting workflows, financial calculators, and role-based access
- Improved frontend performance by ~40% using code splitting, memoization, and optimized Redux state management
- Developed reusable React component libraries used across multiple internal applications
- Integrated high-performance REST APIs and collaborated with backend teams for secure data flow

Tech Stack: React.js, JavaScript, TypeScript, Redux, REST APIs, PostgreSQL, AWS

2022 - 2024
React Js Frontend Developer
Tarkashilpa Technologies

Key Result Area

- Developed and scaled React.js applications for Fintech, CRM, E-commerce, and B2B platforms
- Worked on major projects including Organic Truck, NTT Data Portal, Machinery Max, and Axis Bank CRM
- Built data-heavy dashboards and admin panels with focus on performance and UI/UX consistency
- Implemented reusable UI components and optimized rendering performance

Tech Stack: React.js, JavaScript, Redux, HTML5, CSS3

Personal Information

City Mumbai

Country INDIA

2020 - 2022

Software Developer
Woodpecker Solutions

Key Result Area

- Developed Employee Portals, Company Websites, and E-commerce UI using React.js
- Built responsive interfaces with HTML, CSS, and JavaScript
- Integrated frontend applications with backend APIs

Tech Stack: React.js, JavaScript, HTML5, CSS3

Projects

716 Days

LOS

I am working as a Software Developer on the Loan Origination System (LOS), a fully digitized workflow platform used for credit evaluation, loan processing, partner onboarding, and sales operations. I have contributed to end-to-end UI development using React.js, Redux, and TypeScript, building highly responsive, scalable, and performance-optimized modules.

716 Days

SALES

The Sales Portal is a centralized platform designed to streamline lead management, sales tracking, field operations, and partner coordination across multiple lending products. I contributed as a Frontend Developer, building high-performance, interactive modules using React.js, Redux Toolkit.

716 Days

PARTNER

The Partner Portal is a unified digital platform that enables DSAs, channel partners, and external agencies to manage lead submissions, track application progress, upload documents, and collaborate with internal loan teams. As a Frontend Developer, I contributed to building scalable, user-friendly, and secure features using React.js, Redux Toolkit.
