EXPERIENCE

Full Stack Developer

Tata Consultancy Services

Aug 2021 - Present

Mumbai, India

- Developed scalable, high-performance backend services for a banking application in an Agile environment using **Node.js** and **Express.js**, including secure **RESTful API** with **JSON Web Token** - based authentication and authorization.
- Designed and optimized **SQL/NoSQL** databases, wrote efficient queries, and ensured data integrity, security, and performance for sensitive financial and non-financial data.
- Developed responsive front-end systems using **React.js** and its core principles, **Redux** for state management, and **JavaScript** (including **DOM manipulation** and the JavaScript Object Model), while leveraging **HTML5** and **CSS3** to deliver responsive web designs, resulting in a **40%** improvement in application response time.
- Designed, deployed, and managed **AWS** cloud infrastructure (EC2 and related services) while utilizing **Git** for version control to ensure secure, scalable, and collaborative banking application development.
- Collaborated with a **15–20** member engineering team, mentoring junior developers, to design, implement, and launch new banking application features while conducting code reviews to ensure high code quality, maintainability, and adherence to best practices.
- Worked closely with the **QA/testing** team to ensure all software solutions were thoroughly tested and met banking quality and security standards.
- Completed a **7-month** onsite assignment in **London**, working directly with key banking stakeholders to gather requirements and design application features aligned with business and regulatory needs.

SKILLS

Languages:	JavaScript, SQL, MongoDB, HTML, CSS, Python, C, C++
Technologies:	NodeJs, ExpressJs, ReactJs, Redux, React-Router, TypeScript, REST API, Unix, PL/SQL MVC Architecture, Bootstrap, Web API, Data Structure and Algorithms, Webpack, NPM
Tools:	Git, AWS, Postman, MongoDB Atlas, ESLint, Agile Methodology, Visual Studio, Jira
Testing Tools:	Jest, Mocha, Chai
Soft Skills	Problem Solving, Decision Making, Continuous Learning, Creative Thinking,

EDUCATION

Bachelor in Computer Engineering

Mumbai University - CGPA: **8.58/10**

2017 - 2021

PROJECTS

EcoEscapes(Tour Booking Application): Designed and developed as a full-stack project utilizing MongoDB for database, Node.js for backend and HTML, CSS and Pug template for frontend and REST API. Implemented a payment gateway using the Stripe API and integrated SendGrid API for email notifications. ([GitHub](#))

WorldWise(Pinning Visited Places on Map): Developed a Single Page Application using React.js, integrated maps with the Leaflet API, and utilized React Router for navigation and state management. ([GitHub](#))

NewsGlobe(Displays News): Created a news application using React.js, which fetches news from a remote server, categorizes the content into different types, and divides the news into multiple pages for better organization and user experience. ([GitHub](#))

ACHIEVEMENTS

- **Best Team Award:** Received recognition for working enthusiastically and collaboratively on priority development tasks.
- **Best Practice Sharing:** Received recognition for delivering remarkable development work with no bugs.
